

NURSING (NURS)

NURS 300 Bridge to Professional Nursing (Units: 3)

Prerequisite: Restricted to ADN-BSN majors.

Professional behaviors, leadership, health care systems (micro, meso, and macro), health promotion, illness prevention, teaching/learning theories, quality improvement, family theory and child abuse training, informatics, nursing theory, and decision making. (ABC/NC grading only; CR/NC allowed)

NURS 310 Human Development and Health Assessment Theory (Units: 3)

Prerequisites: Restricted to upper-division Nursing majors; concurrent enrollment in NURS 311, NURS 314, and NURS 315.

Examination of physical assessment techniques, appropriate use of commonly used screening tools, health information technologies, HIPAA, developmental considerations in assessment, interviewing techniques, screening, dosage calculations, and basic nursing interventions. (Plus-minus letter grade only) [Formerly part of NURS 311]

NURS 311 Human Development and Health Assessment Lab (Units: 2)

Prerequisites: Restricted to upper-division Nursing majors; concurrent enrollment in NURS 310, NURS 312GW, NURS 314, and NURS 315.

Practicing examination of physical assessment techniques with appropriate use of commonly used screening tools, health information technologies, HIPAA, developmental considerations in assessment, interviewing techniques, screenings, dosage calculations, medication administration practice, and basic nursing interventions. Extra fee and nursing kit required. (Plus-minus letter grade only) [Formerly part of NURS 311]

NURS 312GW Research and Evidence-Based Practice in Nursing - GWAR (Units: 3)

Prerequisites: Restricted to Nursing majors; GE Area A2; concurrent enrollment in NURS 310, NURS 311, NURS 314, and NURS 315.

Principles of evidence-based practice, research methodology, and application of research and evidence-based practice in a clinical setting. (Plus-minus ABC/NC grading only)

Course Attributes:

- Graduation Writing Assessment

NURS 314 Health Promotion in Nursing (Units: 3)

Prerequisites: Restricted to upper division Nursing major; concurrent enrollment in NURS 315 and all first-semester Nursing courses.

Examination of determinants of health, levels of prevention, health literacy, social marketing, behavior change theory, advocacy and disaster preparedness. [Formerly part of NURS 314]

NURS 315 Health Promotions in Nursing - Practicum (Units: 2)

Prerequisites: Restricted to upper-division Nursing majors; concurrent enrollment in NURS 311, NURS 312GW, and NURS 314.

Health promotion activities and basic nursing interventions in community and primary care settings. Extra fee required. (CR/NC grading only) [Formerly part of NURS 314]

NURS 326 Reproductive Health Theory (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 1 Nursing courses; concurrent enrollment in NURS 327, NURS 328, NURS 329, NURS 350.

Examination of reproductive health issues, normal pregnancy, health disparities, health policy, genomics/genetics, health promotion, domestic violence, evidence-based practice, nursing care during pre-conception, prenatal, intrapartum and post partum. Application of theoretical knowledge and skills in a variety of care settings. [Formerly part of NURS 326]

NURS 327 Reproductive Health Practicum (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 1 Nursing courses; concurrent enrollment in NURS 326, NURS 328, NURS 329, NURS 350.

Application of reproductive health theoretical knowledge and skills in a variety of care setting. (CR/NC grading only) [Formerly part of NURS 326]

NURS 328 Psychiatric Mental Health Nursing Theory (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 1 Nursing courses; concurrent enrollment in NURS 326, NURS 327, NURS 329, NURS 350.

Examination of most common psychiatric causes of morbidity and mortality including pathophysiology, pharmacologic and nursing interventions. Survey of epidemiology, health policy, legal/ethical considerations, communication, evidence-based practice and informatics. [Formerly part of NURS 328]

NURS 329 Psychiatric Mental Health Nursing Practicum (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 1 nursing courses; concurrent enrollment in NURS 326, NURS 327, NURS 328, NURS 350.

Application of mental health theoretical knowledge and nursing interventions in a care setting. (CR/NC grading only) [Formerly part of NURS 328]

NURS 350 Nursing Interventions Practicum I (Units: 2)

Prerequisites: Restricted to Nursing majors; successful completion of semester 1 nursing courses, concurrent enrollment in NURS 326, NURS 328.

Examination of basic nursing interventions including standard precautions, aseptic technique, IV management venipuncture, catheter insertion and management, and advanced assessment. Exploration of patient safety concerns, documentation, informatics and use of the research evidence. Laboratory includes demonstration, practice, and return demonstration.

NURS 410 Nursing Care of Children Theory (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 2 nursing courses; concurrent enrollment in NURS 411, NURS 420, NURS 421, NURS 450.

Examination of pathophysiology, pharmacology, and nursing care of ill children. [Formerly part of NURS 410]

NURS 411 Nursing Care of Children Practicum (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 2 nursing courses; concurrent enrollment in NURS 410, NURS 420, NURS 421, NURS 450.

Application of pathophysiology, pharmacology, and nursing care of ill children. (CR/NC grading only) [Formerly part of NURS 410]

NURS 420 Nursing Care of Adults Theory (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 2 nursing courses; concurrent enrollment in NURS 410, NURS 411, NURS 421, NURS 450.

Examination of pathophysiology, pharmacology and nursing care of chronic and acute conditions in the adult patient. [Formerly part of NURS 420]

NURS 421 Nursing Care of Adults Practicum (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 2 nursing courses; concurrent enrollment in NURS 410, NURS 411, NURS 420, NURS 450.

Application of pathophysiology, pharmacology and nursing care of chronic and acute conditions in the adult patient. (CR/NC grading only) [Formerly part of NURS 420]

NURS 450 Nursing Interventions Lab II (Units: 2)

Prerequisites: Restricted to Nursing majors; successful completion of semester 2 nursing courses; concurrent enrollment in NURS 410, NURS 420.

Practical application of nursing interventions, assessment, patient-centered care, evidenced-based practice, standard precautions, informatics, and safety principles in a laboratory.

NURS 520 Advanced Medical Surgical and Critical Care Nursing (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 3 nursing courses; concurrent enrollment in NURS 521 or NURS 523, NURS 522, NURS 530, NURS 531.

Examination of pathophysiology, pharmacology and nursing care of critically ill patients, evidence-based practice, quality improvement, safety, teamwork and collaboration, leadership, nursing roles, patient-centered care, informatics, and factors influencing health outcomes. [Formerly part of NURS 520]

NURS 521 Advanced Medical Surgical and Critical Care Nursing Capstone Practicum (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 3 nursing courses; concurrent enrollment in NURS 520, NURS 522, NURS 530, NURS 531.

Examination of pathophysiology, pharmacology and nursing care of critically ill patients, evidence-based practice, quality improvement, safety, teamwork and collaboration, leadership, nursing roles, patient-centered care, informatics and factors influencing health outcomes. Course will be taught using a cohort model. Not open to students who have completed NURS 523. (CR/NC grading only) [Formerly part of NURS 520]

NURS 522 Chronic Care and End of Life Care Theory (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 3 nursing courses; concurrent enrollment in NURS 520, NURS 530.

Examination of palliative care, symptom management, cultural, legal/ethical safety, hospice care/case management, nutrition, education/health promotion, elder abuse, evidence-based practice, safety, information technologies, nursing roles in palliative care/end of life care, communication strategies.

NURS 523 Advanced Medical Surgical and Critical Care Nursing Capstone Practicum (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 3 nursing courses; concurrent enrollment in NURS 520, NURS 522, NURS 530, NURS 531.

Examination of pathophysiology, pharmacology and nursing care of critically ill patients, evidence-based practice, quality improvement, safety, teamwork and collaboration, leadership, nursing roles, patient-centered care, informatics, and factors influencing health outcomes through the preceptorship model. Not open to students who have completed NURS 521. (CR/NC grading only) [Formerly part of NURS 520]

NURS 530 Community Health and Global Perspectives Theory (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 3 nursing courses; concurrent enrollment in NURS 520, NURS 521 or NURS 523, NURS 522, NURS 531.

Examination of occupational and environmental health, issues in global health, comparison of healthcare systems, healthcare economics, epidemiology, rural health, program planning and evaluation, leadership, and disaster preparedness. [Formerly part of NURS 530]

NURS 531 Community Health and Global Perspectives Practicum (Units: 3)

Prerequisites: Restricted to Nursing majors; successful completion of semester 3 nursing courses; concurrent enrollment in NURS 520, NURS 521 or NURS 523, NURS 522, NURS 530.

Exploration of occupational and environmental health, global health issues that affect local communities, identification of community resources to promote optimal health, epidemiology, program planning and evaluation within an agency serving a local community. (CR/NCR grading only) [Formerly part of NURS 530]

NURS 558 Professional Practice Concepts Theory (Units: 3)

Prerequisites: Restricted to students in the ADN-BSN program.

Opportunity to explore leadership and management concepts in nursing practice. Examination of organizational structure and aspects of leadership central to the clinical staff role.

NURS 699 Independent Study in Nursing (Units: 1-3)

Prerequisite: Upper-division standing or permission of the instructor.

An intensive study of a particular problem in nursing under direction of a member of the department. Enrollment by petition approved by the instructor, adviser, and department chair. Open to regularly enrolled students only. May be repeated for credit a total of 6 units.

NURS 702 Health Systems Management (Units: 3)

Prerequisites: Restricted to students in the M.S.N. program; NURS 706.

Assessment of healthcare organizations, identification of systems issues and organization-wide changes. Use of complexity science, systems thinking, business and financial models to analyze practice quality and cost. Use of QI models and tools.

NURS 703 Education, Informatics, and eTechnology in Advanced Nursing Practice (Units: 3)

Prerequisite: Restricted to students in the M.S.N. program.

Teaching and learning principles, health literacy and patient education strategies including adult learning principles. Use of information technologies in patient education. Analyze impact of information technologies/eTechnologies on patient education.

NURS 706 Health Care Policy and Nursing Leadership (Units: 3)

Prerequisite: Restricted to MS in Nursing or Healthcare Administration Certificate students.

Concepts and theories of public policy-making and relevant political systems in the context of healthcare delivery in the U.S. Leadership theory and models including effective leadership strategies to deal with conflict and manage teams.

NURS 708 Diagnosis and Management in Primary Care (Units: 4)

Prerequisite: Restricted to students in the M.S.N. program and FNP emphasis.

Diagnosis and management of primary care health problems across the lifespan with an emphasis on evidence-based practice and health/illness theories from multiple disciplines. Interdisciplinary approach to primary care and health promotion.

NURS 711 Advanced Physical Assessment Across the Life Span (Units: 3)

Prerequisite: Restricted to students in the M.S.N. program.

Advanced physical assessment skill acquisition with interpretation and documentation of lab and examination findings across the life span. Use of critical thinking and evidence-based practice approach to health promotion/health maintenance across the life span. Lecture, 2 units; laboratory, 1 unit. Extra fee required.

NURS 715 Pharmacological Principles Across the Life Span (Units: 3)

Prerequisite: Restricted to students in the M.S.N. program.

Clinical application of pharmacology of drugs commonly used in the treatment of chronic disease and minor acute illness across the lifespan; integration of drug therapy.

NURS 716 Advanced Pathophysiology and Diagnostic Reasoning I (Units: 3)

Prerequisite: Restricted to students in the M.S.N. program.

Integration of advanced physiology and pathophysiology with clinical application to advanced practice nursing; diagnostic reasoning.

NURS 717 Advanced Pathophysiology and Diagnostic Reasoning II (Units: 3)

Prerequisite: Restricted to students in the M.S.N. program.

Integration of advanced pathophysiology with clinical management approaches across the lifespan. Advanced diagnostic reasoning.

NURS 720 Epidemiology and Biostatistics in Advanced Practice Nursing (Units: 3)

Prerequisites: Restricted to students in the M.S.N. program; course in inferential statistics.

Epidemiology and interrelationship with biostatistics. Understanding the complex factors involved in the distribution of health and disease in the population. Application of concepts in a variety of care settings and in specific patient populations.

NURS 721 Program Planning and Financial Management in Nursing Practice (Units: 3)

Prerequisite: Restricted to MS in Nursing or Healthcare Administration Certificate students.

Use program planning models to conduct a needs/asset assessment and develop an evaluation plan. Utilize business planning and financial management principles to develop a business plan and conduct a financial analysis of an organization or work unit. [CSL may be available]

NURS 732 Ethics in Advanced Nursing Practice (Units: 3)

Prerequisite: Restricted to students in the M.S.N. program.

Case and problem-based approach to ethics, ethical dilemmas and ethical decision making for advanced practice nurses. Exploration of ethical principles related to contemporary clinical issues using a patient-centered approach.

NURS 794 Research and Evidence-Based Practice in Nursing (Units: 3)

Prerequisites: Restricted to students in the M.S.N. program; permission of the instructor.

Research methodologies, translational research and scholarship. Critical appraisal of sources of information. Application of evidence-based practice models in a variety of healthcare settings.

NURS 804 Professional Issues and Nurse Practitioner Skills (Units: 3)

Prerequisites: Restricted to Family Nurse Practitioner graduate students; NURS 810; concurrent enrollment in NURS 811 or NURS 812.

Examination of NP roles and skills including invasive diagnostic and treatment procedures, emergencies in primary care settings, standardized procedures, clinical protocols, furnishing license and legal issue. Extra fee required.

NURS 806 Graduate Nursing Practicum I: Psychiatric/Mental Health (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the population that requires psychiatric healthcare.

NURS 807 Graduate Nursing Practicum II: Psychiatric/Mental Health (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the population that requires psychiatric healthcare.

NURS 808 Graduate Nursing Practicum I: Community/Public Health (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for individuals, families, and/or aggregates living in communities.

NURS 809 Graduate Nursing Practicum II: Community/Public Health (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for individuals, families, and/or aggregates living in communities.

NURS 810 Family Nursing Practitioner Practicum I (Units: 4)

Prerequisites: Restricted to Family Nurse Practitioner graduate students; NURS 711.

Beginning clinical practicum in a primary care setting. Use of evidence-based approach to provide health promotion and illness management to individuals and families across the lifespan. Completion of 200 practicum hours.

NURS 811 Family Nursing Practitioner Practicum II (Units: 4)

Prerequisites: Restricted to Family Nurse Practitioner graduate students; NURS 810.

Continuation of clinical practicum in a primary care setting. Use of evidence-based approach to provide health promotion and illness management to individuals and families across the lifespan. Completion of 200 practicum hours.

NURS 812 Family Nursing Practitioner Practicum III (Units: 4)

Prerequisites: Restricted to Family Nurse Practitioner graduate students; NURS 811.

Refine clinical practice in a primary care setting. Use of evidence-based approach to provide health promotion and illness management to individuals and families across the lifespan. Completion of 200 practicum hours.

NURS 813 Graduate Nursing Practicum I: Neonatal (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the newborn population.

NURS 814 Graduate Nursing Practicum II: Neonatal (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the newborn population.

NURS 815 Graduate Nursing Practicum I: Nursing Administration (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of administrative role in health care to address disease prevention and management, health promotion, and illness prevention for individuals, families, and/or aggregates.

NURS 816 Graduate Nursing Practicum II: Nursing Administration (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of administrative role in health care to address disease prevention and management, health promotion, and illness prevention for individuals, families, and/or aggregates.

NURS 817 Graduate Nursing Practicum I: Women's Health/Gender-Related (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the female or self-identified female population.

NURS 818 Graduate Nursing Practicum II: Women's Health/Gender-Related (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the female or self-identified female population.

NURS 819 Graduate Nursing Practicum I: Adult/Gerontology (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the adult-gerontology population.

NURS 820 Graduate Nursing Practicum II: Adult/Gerontology (Units: 4)

Prerequisites: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the adult-gerontology population. [Formerly NURS 801]

NURS 821 Graduate Nursing Practicum I: Pediatrics (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Synthesis and application of concepts from nursing, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the pediatric population. [Formerly NURS 802]

NURS 822 Graduate Nursing Practicum II: Pediatrics (Units: 4)

Prerequisite: Restricted to Master of Science in Nursing students with the permission of an advisor.

Integration of concepts from nursing, business, social sciences, education, and epidemiology in a healthcare setting to address disease prevention and management, health promotion, and illness prevention for the pediatric population.

NURS 850 Seminar in Specialized Nursing Practice: School Nursing I (Units: 4)

Prerequisite: Admission to the School Nurse Credential Program.

Provision and application of concepts needed for nursing practice in the schools. Focuses on the three major competencies of school nursing practice: providing health and wellness services, providing direct client care services for school-age children (pre-k through age 22), and professional management of school nursing services. Emphasis is on the foundations of school nursing practice, legal and ethical issues, and management of episodic illness and chronic health conditions.

NURS 851 Seminar in Specialized Nursing Practice: School Nursing II (Units: 4)

Prerequisites: Restricted to School Nurse Services Credential students; NURS 850.

Provision and application of concepts needed for nursing practice in the schools. Focuses on the three major competencies of school nursing practice: providing health and wellness services, providing direct client care services for school-age children (pre-k through age 22, and professional management of school nursing services. Emphasis is on health promotion programs, adolescent health, behavior assessment and management, and health service program coordination and management.

NURS 852 Advanced Pediatric Health Assessment (Units: 3)

Prerequisite: Admission to the School Nurse Credential Program.

Presents techniques related to the physical assessment, in the school or home setting, of the child, age birth through 18 years. Emphasis is on the common morbidities and mortalities of these age groups including the interrelationship of the physical, emotional, and socioeconomic causes of health problems and illnesses. Requires an otoscope and stethoscope. Individual practice is required outside of class.

NURS 853 Vision Screening (Unit: 1)

Prerequisite: Admission to the School Nurse Credential program.

Theory and practice of detecting idiopathic scoliosis, visual disorders resulting from inadequate refraction, ocular mal-alignment, and color deficiency in the school setting. The pathophysiology of said conditions will be presented, the nursing role delineated, and opportunities for paired screening practice provided.

NURS 854 Immunizations and the Role of the School Nurse (Units: 2)

Prerequisite: Admission to the School Nurse Credential Program.

Presentation of science behind vaccine-preventable illnesses, as well as immunization recommendations and schedules. Presentation of the critical role school nurses play in providing students, families, and school employees with accurate immunization information and access to immunization resources, promoting vaccine compliance, and addressing vaccine hesitancy.

NURS 855 School Health Policy and Leadership (Units: 4)

Prerequisite: Restricted to School Nurse Services Credential students.

The interactions among school districts, community healthcare providers, and healthcare insurers, healthcare decision-making at the population level, and the social and economic environment of healthcare are explored. Concepts and theories of public policy-making, relevant political systems in the context of healthcare delivery in the U.S., and effective leadership models for influencing healthcare and health policy are explored.

NURS 856 Practicum in Specialized Nursing Processes: School Nursing (Units: 4)

Prerequisites: Restricted to School Nurse Services Credential students; NURS 850; concurrent enrollment in NURS 851.

Application of a planned sequence of supervised clinical experiences in one or more California public school districts offering nursing services to infants, children, and adolescents for the purpose of developing a clinical leadership role in school nursing. Focuses on the three major competencies of school nursing practice: providing health and wellness services, providing direct client care services for school-age children (pre-k through age 22, including students with special healthcare needs), and professional management of school nursing services. (Credit/No Credit grading only)

NURS 895 Applied Research in Nursing (Units: 3)

Prerequisites: Permission of advisor, department chair, committee, and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies.

Integration of advanced nursing concepts in a written document such as intervention plan, grant proposal, business plan, focused review of the literature, clinical protocol or analysis paper demonstrating achievement of advanced practice nurse competencies. (CR/NC, RP grading only)

NURS 897 Research in Nursing (Units: 1-3)

Prerequisites: Advancement To Candidacy (ATC) on file and departmental approval.

Study, discussion, and evaluation of topics germane to nursing. May not be used to satisfy M.S.N. minimum requirement for ATC. May be repeated with departmental approval. (CR/NC grading only)

NURS 898 Master's Thesis (Units: 3)

Prerequisites: Permission of the advisor, department chair, committee, and approval of Advancement to Candidacy (ATC) and Culminating Experience (CE) forms by Graduate Studies. ATC and Proposal for Culminating Experience Requirement forms must be approved by the Graduate Division before registration.

(CR/NC grading only)

NURS 899 Independent Study (Units: 1-3)

Prerequisite: Permission of the graduate major adviser and supervising faculty member.

An intensive examination, analysis, or synthesis of a problem under the direction of a member of the faculty. Open only to regularly enrolled students. May be repeated for a total of 6 units.
